**Introduction:** *Having an amazingly varied 12+ years freelance career working simultaneously in the maritime industry, private island sector, fitness & performance arts, I am grateful to have achieved and continue to grow many skills and credentials on my journey. This career variety has created my super strength - planning and managing in 4-D; organizing multiple moving parts, involving all Departments and how they affect one another, guests & crew, safety, purpose, comfort, entertainment. I have had the experience of every job on board a vessel often as the sole crew (which means covering all departments - working as captain, sailor, mate, engineer, stew & cook for a high end 70' sail yacht & others). Clifton Top 5 Strengths: Empath, Positivity, Learner, Strategic, Arranger.*

**Current Objective:** *regular rotational maritime role with my partner sharing officer roles, while highlighting that purpose is of value.*
