

FLYBOARD KIT
With or without a jetski

WHAT DO I NEED TO KNOW?

The Flyboard is a jetski powered water toy attached to the feet that allows airborne acrobatics at heights up to 12 m.

The rider is standing on a board connected by a long hose to a Jetski. The power is controlled by the crew member riding the Jetski.

Compatible with Yamaha, Seadoo and Kawasaki jetskis.

Available with remote control (no crew member on jetski needed).

The Flyboard requires proper instructions and safety gear before being able to use it successfully and efficiently. As the center of gravity is above the center of thrust the rider needs to have a good balance. Most of the fit youngsters can handle it in approximately 20 min.

No license required.
Instructor available.

SUITABLE FOR

Teenagers Adults

KIT INCLUDES

Board with shoes, Hose, U-pipe,
Jetski adapter to match the model o/b,
