LINKS

I am seeking my next full-time Captain's position onboard a motor yacht. I have had a natural draw towards being at sea for as long as I can remember. I began on small vessels learning everything I could. It was always my goal to know the vessel inside and out. Through my experiences I became well-versed in troubleshooting and engineering. I am constantly learning and progressing, and I feel I have mastered my current range of vessels and am ready to take on new challenges. I am extremely hands on in day-to-day operations, and I have no problem helping out in all departments, as I feel this contributes to a strong team atmosphere onboard.
